

In a world of constant digital noise, find a moment of quiet focus with pilsa, the Korean art of transcriptive meditation. This practice of slowly copying texts by hand is a powerful way to cultivate mindfulness and clarity. This guided journal contains 73 insightful quotations exploring the durability and risks of satellite networks. Each quote is presented on a left-hand (verso) page, with a corresponding 5 mm dot grid on the right-hand (recto) page for your transcription. Embrace the meditative rhythm of pen on paper and discover a universe of thought.
