

Discover the mindful Korean art of pilsa, a form of transcriptive meditation that cultivates focus and calm. This unique journal guides your practice with 87 insightful quotations on the future of space robotics. Each compelling quote is displayed on a verso page, with a corresponding recto page featuring a 5mm dot grid for your transcription. Slow down, select your favorite pen, and connect with profound ideas through the simple, meditative act of writing. Your journey into this fusion of technology and tranquility begins now.
